FAB005	EMC Testing	95/54/EC, Reg 10.02	Witness Tests	11 May 2004	Mark Rushton

The facilities listed in this register entry have been appraised in accordance with VCA internal quality procedure WI 03-101 to indicate their acceptability for official witnessed tests and/or COP purposes to VCA engineers. An entry in this register does not constitute any form of approval and recognition of this entry by third parties for any other purpose is entirely at their own risk. The appraisal is valid for a maximum period of three years, but VCA reserves the right to reassess the entry if witnessed tests are not routinely undertaken. The facility is obliged to inform VCA of any major changes to equipment, procedures or personnel, and at its discretion VCA may temporarily or permanently remove the facility from the register without notice until a satisfactory reappraisal has been completed. Application must also be made to extend the use of the facility to cover additional or new Directives and Regulations.
